

KUBOTA MINI EXCAVATOR

U50-5 / U56-5 KX060-5

Engine output (PS):

U50-5 : 40.4

U56-5 : 47.6

KX060-5 : 47.6

Machine weight (kg):

U50-5 : 4,890

U56-5 : 5,520

KX060-5 : 5,560

The next generation of mini excavators with advanced performance, comfort, and safety.

Kubota's new 5-ton mini excavators are ready to take charge and deliver new levels of performance, comfort, and safety for a wide range of jobs.

All feature newly designed interiors and exteriors, and all are built with the most advanced technology Kubota has to offer.

U50-5

The smallest in size, but capable of a wide range of tasks.

U56-5

The right size and performance for a wide range of jobs.

The image features a central photograph of a Kubota KX060-5 mini excavator, which is orange and black with a large black bucket. The excavator is positioned against a background that is split into a teal upper half and a grey lower half. Above the excavator, three teal circles are connected by lines, each containing a key feature: 'COMFORT EASY OPERATION', 'SERVICE SAFETY SECURITY', and 'PERFORMANCE'. The 'PERFORMANCE' circle has a line pointing to the excavator's arm. In the bottom right, the model name 'KX060-5' is written in a bold, black font, followed by a descriptive sentence. At the bottom, the text 'KUBOTA MINI EXCAVATOR' is in a smaller, bold, black font, and the model names 'U50-5', 'U56-5', and 'KX060-5' are listed in large, light grey font, with 'KX060-5' being the largest.

KX060-5**

COMFORT / EASY OPERAT

A bigger cabin with enhanced insulation, improved visibility, and a wealth of new comfort features.

SPACIOUS & COMFORTABLE

With new interior designs, the cabins on all three models offer improved comfort for operators of any size. The designs feature a slimmer, more ergonomically positioned right meter panel and greater head and foot space. The result is more room and greater comfort for the operator, and that means improved productivity on the job.

CONCENTRATED KEY PAD

Redesigned for greater comfort and improved operability, the key pad features a compact profile and places all of the main switches on the right side for easier access.

DOUBLE ADJUSTABLE AIR SUSPENSION SEAT

As part of the new design, the cabin is now equipped with a seat with a slide that can be double-adjusted to improve comfort. The joystick consoles on the left and right sides of the seat also can be adjusted independently of the seat to match individual operator requirements. An ISO-compliant air suspension seat, as standard for the L models, reduces vibrations to provide optimum operator comfort. An electric seat-height adjustment system simplifies and improves adjustment by the operator.

EXPANDED GLASS AREA

A slimmer frame design means 20% more glass in the front window, skylight, and left and right windows. This greater glass area not only improves safety during loading, unloading, and digging work—operators can monitor the left and right edges of the dozer as well as the bucket through the skylight—it also enhances the feeling of spaciousness in the cab.

LOW NOISE

World-class noise reduction helps protect the operator's ears as well as provides a more stress-free working environment for the operator. Rear engine noise is reduced by a metal partition between the engine and the cab. The floor plate is also thicker to reduce noise from beneath the cab.

*LpA: U50-5: 71dB U56-5 & KX060-5: 74dB

ENHANCED LEGROOM

The new cabin design and interior layout not only optimize operability, but also provide much more foot space for greater operator comfort.

AIR CONDITIONER (TYPE L ONLY)

The air conditioner duct now directs air to the back of the operator's neck to enhance the effect and efficiency of the air conditioning.

PERFORMANCE

Advanced Kubota Engines and hydraulic systems ensure superior performance and operability in real-world working conditions.

WORKING RANGE

Kubota's new 5-ton mini excavators deliver impressive performance and efficiency for their size, with exceptional bucket digging force, outstanding arm reach, and a well-matched arm and bucket. Even tough digging jobs will get done faster and more efficiently.

AUTO-SHIFT

The auto-shift system enables automatic travel shift from high to low depending on traction effort and terrain. This gives smoother operations when dozing and turning.

LOAD SENSING HYDRAULIC SYSTEM

Kubota's load sensing hydraulic system ensures smoother operation, regardless of load size. It allows hydraulic oil to flow according to the specific range of the operator's lever motion. The result is greater fuel economy and smoother travelling.

KUBOTA ORIGINAL DI ENGINE WITHS CRS AND DPF MUFFLER

Kubota Original DI Engine equipped with CRS and DPF, Kubota's direct-injection engines are now fully Stage-V compliant. The new and improved DPF reduces maintenance by increasing the service intervals for both the regeneration filter and ash cleaner.

AUTOMATIC REGENERATION SYSTEM

DPF regeneration (PM combustion stroke) is performed automatically, before soot reaches a critical level, so the operator never needs to stop work to clean the DPF.

AUTOMATIC ACTIVATION OF 3rd LINE HYDRAULIC RETURN*

No more climbing down from the cab and reaching under the bonnet to manually open and close the 3rd line hydraulic return. The U56-5 and KX060-5 both feature an electronically controlled 3rd line hydraulic return that is automatically activated when the operator selects breaker mode on the digital panel in the cab.

VERSATILE CONTROL

Two auxiliary circuits (SP1 and SP2*) come standard on the U50-5, U56-5 and KX060-5. The maximum oil flow settings of both circuits are conveniently adjustable from the digital panel. No additional tools or complex manual adjusting procedures are necessary.

OPTIMISED SITE CLEANING

The gap between the blade and the bucket edge is optimised. This enables easier site cleaning and levelling.

INTRODUCING DOZER BLADE FLOAT

You don't need to adjust the dozer height to make a clean ground surface—after backfilling, just travel backward along the covered ditch with the dozer in the float position. Ground finishing work is now fast and easy!

*For Type L.

SERVICE

A fully opening bonnet and optimum arrangement of internal parts for quick and efficient service and a shorter downtime.

ONE-SIDED ENGINE MAINTENANCE

Kubota has made routine maintenance extremely simple by consolidating primary engine components onto one side for easier access. Engine and other vital components can be inspected quickly and easily.

A. Water Separator

B. DPF Muffler

C. Fuel Filter

D. Engine Oil Gauge

E. Alternator

F. Starter Motor

TWO-PIECE HOSE DESIGN

The dozer blade's two-piece hose design reduces hose replacement by 60% compared to one-piece hoses.

TOOL STORAGE BOX WITH GREASE GUN HOLDER

The tool storage box is conveniently located under the cab door for quick access. The box also features a grease gun holder to keep the grease gun within easy reach during maintenance.

SIDE BONNET FEATURES

ELECTRIC REFUELLING PUMP WITH PROGRESS ALERT*

The KX060-5's electric refuelling pump includes an auto-stop function that reduces the risk of spillage. When refuelling directly from a fuel can or fuel supply pump, simply press the signal button conveniently located next to the fuel inlet to monitor the progress. The beeping signal accelerates as the fuel approaches full thus avoiding spillage.

*Refuelling pump is standard for Type L on KX060-5.

SAFETY / SECURITY

Advanced technology help keep the operator and your mini excavator safe and secure.

TIE DOWN POINTS ON THE TOP FRAME

Four tie down points are now installed on the top frame for safer and easier transportation.

REAR-VIEW CAMERA* (OPTION)

An optional rear-view camera significantly improves visibility towards the rear of the mini excavator by displaying the view on the 7" LCD screen in the cab.

TRAVEL ALARM (OPTION)

To help ensure a safe working environment, an optional travel alarm warns nearby workers that the mini excavator is on the move.

*Prior to fitment, the machine already satisfies the visibility performance criteria defined in ISO5006. The rear-view camera enhances operator's visibility, but does not replace the need for viewing directly and using the mirrors fitted.

LED WORK LIGHT WITH TURN-OFF DELAY

The LED work light can be programmed to turn off 30 seconds to 2 minutes after the engine has stopped. This allows the operator to exit the machine and walk away safely under full illumination.

SEAT BELT ALARM AND HIGH-VISIBILITY SEAT BELT

The bright orange seat belt visually reminds operators to fasten it before turning on the engine. Should the operator forget, a warning function will prompt the operator to fasten it.

ARM, BOOM AND DOZER ANTI-DROP VALVES

The machines are fitted with a boom and arm-lowering control device (ISO8643) as standard.

KUBOTA ORIGINAL ANTI-THEFT SYSTEM

Your U50-5, U56-5 and KX060-5 are protected by Kubota's industry-leading anti-theft system. Only programmed keys will enable the engine to start up. Attempting to start with an un-programmed key will activate the alarm. Newly enhanced features include an alert to remind the operator to extract the key after operation, and an LED alert to prevent potential theft.

DIGITAL PANEL

Intuitive operation and large LCD screen help to enhance both safety and performance.

Standard Monitor Display

NEW FULL-COLOR LCD SCREEN

A full-color, high-resolution 7" LCD screen provides with a single glance all the information the operator needs to operate the mini excavator. An intuitive interface ensures quick understanding and easy access to the mini excavator's various functions, including AUX flow adjustment. Important maintenance items are also displayed, as are detailed alerts for improper machine functions and abnormalities. The new jog dial is both intuitive and easy to use. Even first-time operators will be able to quickly access all important information.

Please note:

- * The lifting capacities are based on ISO10567 and do not exceed 75% of the static tilt load of the machine or 87% of the hydraulic lifting capacity of the machine.
- * The excavator bucket, hook, sling and other lifting accessories are not included on this table.
- * Standards EN474-1 and EN474-5 require the machine to be fitted with a safety valve on the boom cylinder and an overload warning buzzer for object handling operations.

★ All images shown are for brochure purposes only.
When operating the excavator, wear clothing and equipment in accordance to local legal and safety regulations.

Kubota Genuine and Approved Parts
for maximum performance, durability and safety

A collection of Kubota maintenance parts: a cylindrical oil filter, a rectangular air filter, and a box of Kubota engine oil.
